## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 16-21, drawn to a particular type winder with a core chuck engaging ends of the core in an axial direction.

Group II, claim(s) 22-24, drawn to a method of manufacturing a winding core.

Group III, claim(s) 25-27, drawn to a plurality of adjacent winding cores.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of the Group I invention is the winder with core chuck engaging the core ends and this feature is not present in Groups II and III. The special technical feature of the Group II invention is the method of manufacturing the core and this feature is not present in Groups I and III. The special technical feature of the Group III invention is a plurality of adjacent winding cores without a particular winder and core chucks and this feature is not present in Groups I and II.
